**Bio** Statistical epigenomics postdoctoral associate interested in computational biology, single-cell (epi)genomics, machine learning and neurological diseases.

**Education and Training** **Broad Institute of MIT and Harvard**, Cambridge, MA  
 Statistical Epigenomics Postdoc Associate, **Epigenomics Program** Dec 2018 - Present  
 • Advisors: Martin Aryee, Ph.D., Alexander Meissner, Ph.D. and Andreas Gnirke, Ph.D.

**Baylor College of Medicine**, Houston, TX  
 Ph.D., **Quantitative and Computational Biosciences** Sept 2013 - Sept 2018  
 • Thesis Topic: *Decoding Big Genomic Datasets: Biases, hypotheses & regulation*  
 • Advisors: Zhandong Liu, Ph.D. and Kunal Rai, Ph.D.  
 • Advisory Committee: Zhandong Liu, Ph.D. (Chair), Huda Y. Zoghbi, M.D., Aleksandar Milosavljevic, Ph.D., Olivier Lichtarge, M.D., Ph.D., Mirjana Maletić-Savatić, M.D., Ph.D., Kunal Rai, Ph.D.

**Carnegie Mellon University**, Pittsburgh, PA  
 M.S., **Computational Biology** Aug 2007 - Dec 2008  
 • Academic Achievement Fellowship (2007 - 2009)

**Vellore Institute of Technology**, Vellore, India  
 B. Tech, **Bioinformatics** Aug 2002 - May 2006  
 • Thesis Topic: *Study of Host Protein Mimicry of M. tuberculosis proteins in H. sapiens*  
 • Distinction with highest honors (equivalent to *Summa Cum Laude*)

**Selected Publications**  
 (\* CO-FIRST AUTHORS)

1. **AT Raman\***, AE Pohodich\*, YW Wan, HK Yalamanchili, HY Zoghbi, Z Liu. Apparent bias towards long gene misregulation in MeCP2 syndromes disappears after controlling for baseline variations. *Nature Communications* (2018) (PMID: 30104565)
2. H Yi\*, **AT Raman\***, H Zhang, G Allen and Z Liu. Detecting hidden batch factors through data-adaptive adjustment for biological effects. *Bioinformatics* (2018) (PMID: 29617963)
3. A Pohodich, HK Yalamanchili, **AT Raman**, YW Wan, M Gundry, S Hao, H Jin, J Tang, Z Liu, H Zoghbi. Forniceal deep brain stimulation induces gene expression and splicing changes that promote neurogenesis and synaptic plasticity. *eLife* (2018) (PMID: 29570050). *Computational and Integrative analysis lead (equal contributor)*

(\* CO-FIRST AUTHORS)

1. R Pal, A Chaudhury, M Palmieri, **AT Raman**, R Zahrah, J Neilson, M Sardiello, GG Rodney. *PKC regulates insulin-mediated translation initiation via tRNAiMet recruitment to 40S ribosome.*

**Invited Presentations & Seminars**

1. Amplification-based expression data show bias towards long gene misregulation in synaptic disorders in MeCP2 syndrome. Virtual/oral presentation for the Young Scientist Award session, *Annual Conference Of The Midsouth Computational Biology & Bioinformatics Society (MCBIOS) and MAQC Annual Meeting* (2020)
2. Decoding Big Genomic Datasets: Biases, hypotheses & regulation at *IGIB, New Delhi*. Host: Debasis Dash, Ph.D. and Anurag Agrawal, M.D., Ph.D. (2019)
3. Decoding Big Genomic Datasets: Biases, hypotheses & regulation at *Harvard Medical School, Boston*. Host: Steven McCarroll, Ph.D. (2018)
4. Deciphering epigenomic landscape in colorectal cancer at *Genome Medicine Science Day, MD Anderson Cancer Center, Houston, TX* (2018)
5. Decoding Big Genomic Datasets: Biases, hypotheses & regulation at *Broad Institute of MIT and Harvard, Cambridge*. Host: Evan Macosko, M.D., Ph.D. and Aviv Regev, Ph.D. (2018)
6. Decoding Big Genomic Datasets: Biases, hypotheses & regulation at *Broad Institute of MIT and Harvard, Cambridge*. Host: Martin Aryee, Ph.D., Alexander Meissner, Ph.D. and Andreas Gnirke, Ph.D. (2018)
7. Decoding Big Genomic Datasets: Biases, hypotheses & regulation at *University of Toronto, Toronto*. Host: Mathieu Lupien, Ph.D. (2018)
8. Decoding Big Genomic Datasets: Biases, hypotheses & regulation at *University of California, San Diego*. Host: Bing Ren, Ph.D. (2018)
9. Decoding Big Genomic Datasets: Biases, hypotheses & regulation at *University of California, Los Angeles*. Host: Daniel Geschwind, M.D., Ph.D. (2018)
10. ChIP-seq Analysis: Pipelines and Data Interpretations at *ISB Nucleic Acid Course, Seattle, WA* (2013)
11. Identification of Foxo3/IRF7 circuits that limits inflammatory sequel of antiviral response at *ISB Retreat, Seattle, WA* (2012)

## Teaching Experience

- Teaching Assistant for Bioinformatics Workshop, MD Anderson Cancer Center (Dec. 2017)
- Teaching Assistant for Computational Math for Quantitative Biomedicine, BCM
  - Supervised by Zhandong Liu, Ph.D. and Aleksandar Milosavljevic, Ph.D.
  - Evaluation from the students: **6/7** (Fall 2017)
- Taught a course on ChIP-seq analysis at ISB Nucleic Acid Course (2013)

## Academic Services and Memberships

- **Ad Hoc Peer Review** – IUBMB Life, Stem Cell Research & Therapy
- **Professional Societies and Memberships**
  - Core RSG India Member, ISCB (2016-2017)
  - Contributors of SysBorgTB & Open Source Drug Discovery by CSIR, India
- **Wikipedia articles**
  - [Tumor Metabolism](#) for Cancer Biology course (Spring 2014)

## Posters (\* CO-FIRST AUTHORS)

1. **AT Raman**, A Pohodich, YW Wan, HK Yalamanchili, HY Zoghbi, Z Liu. Amplification-based expression data show bias towards long gene misregulation in synaptic disorders in Rett syndrome. Poster at *Pacific Symposium on Biocomputing (PSB)*, The Big Island of Hawaii (2020)
2. **AT Raman\***, Elias Orouji\*, Kunal Rai. Deciphering epigenomic landscape in colorectal cancer. Poster at *Genome Medicine Science Day, MD Anderson Cancer Center*, Houston, TX (2018)
3. Elias Orouji\*, **AT Raman\***, et al. Colorectal cancer epigenomic landscape. In: *Proceedings of the American Association for Cancer Research Annual Meeting 2018*; 2018 Apr 14-18; Chicago, IL. Philadelphia (PA): AACR; Cancer Res 018;78(13 Suppl):Abstract nr 4315.
4. **AT Raman\***, Elias Orouji\*, Kunal Rai. Deciphering epigenomic landscape in colorectal cancer. Poster at *Chromatin Architecture and Chromosome Organization (Keystone Conference)*, Whistler, British Columbia, Canada (2018)
5. **AT Raman**, A Pohodich, YW Wan, HK Yalamanchili, HY Zoghbi, Z Liu. Amplification-based expression data show bias towards long gene misregulation in synaptic disorders in Rett syndrome. Poster at *Quantitative and Computational Biosciences Annual Retreat*, Houston (2018) – **Second Best Poster Award**
6. **Veena Kochat\***, **AT Raman\***, et al. Oncogenic Role of EZH2 in the Pathogenesis of Malignant Peripheral Nerve Sheath Tumors with Functionally Inactive Polycomb Repressor Complex 2. Poster at *Cancer Epigenetics: New Mechanisms, New Therapies (Keystone Conference)*, Breckenridge, Colorado (2018)
7. **CA Chen**, S Pedersen, **A Raman**, L Wang, J Yin, H Zoghbi, Z Liu, R Pautler, CP Schaaf. NR2F1 mutations: Human phenotypes and investigation of a mouse model. Poster at *ASHG*, Vancouver, Canada (2016)
8. **A Raman** et al. Existence of gene-regulatory network in Macrophages. Poster at *International Conference on Systems Biology and Microbiome*, Seattle (2012)
9. **A Raman** et al. Activation states of genes in Toll Like Receptor induced macrophages. Poster at *International Conference on Systems Biology and Microbiome* (2012), Seattle
10. **A Raman** et al. Strategies in Systems Biology to predict and confirm the existence of gene-regulatory network. Poster at *BioC* (2011), Seattle
11. **A Raman**, Vladimir Litvak, et al. Strategies in systems biology to improve the prediction of gene regulatory network involving the dynamic interaction among the transcription factors. Poster at *Systems Biology in Human Diseases*, Boston (2011)

**Skill-Set  
Summary**

- Experience in Next Gen-Sequencing Data Analysis:  
Proficiency in RNA-seq (5+ years), ChIP-seq (5+ years), Microarray (7+ years)  
Intermediate in NanoString (1+ years), ATAC-seq (1+ years)  
Familiarity scRNA-seq (3+ months)
- Programming Languages:  
Proficiency in R, Perl  
Intermediate in C/C++, MATLAB, Java, Shell Scripting  
Familiarity in Python, Octave
- High Performance Computing: Load Sharing Facility (LSF), Condor
- Operating Systems: Linux, Windows, Mac OS X, Unix

**Research  
Experience –  
Details**

**Statistical Epigenomics Postdoc Associate** Dec 2018 - Present  
Aryee, Meissner and Gnirke Groups, Broad Institute and MGH Cambridge, MA

- Understanding the dynamics of gene regulation using single-cell genomics and long read sequencing

**Research Assistant** July 2015 - Sept 2018  
Liu's Lab (in collaboration with Zoghbi's lab), BCM Houston, TX

- Amplification-based expression data show bias towards long gene misregulation in synaptic disorders (Published in *Nature Comm.*)
- Developed batch detection algorithm in gene expression datasets (Published in *Bioinformatics*)
- Mechanism behind the effects of deep brain stimulation in Rett syndrome, meta-analysis of activity dependent genes and intellectual disorders (Published in *elife* and *Hum Mol Genet.*)

**Research Assistant** July 2015 - Sept 2018  
Rai Lab, Genome Medicine, MD Anderson Cancer Center Houston, TX

- Studying epigenomic landscape in colorectal tumors (*bioRxiv*; In review at *Gut*)
- Oncogenic Role of EZH2 in the pathogenesis of MPNST tumors (manuscript in prep)
- Role for the TRIM28/KRAB repressors during early development, with a particular emphasis in nuclear reprogramming (Published in *Stem Cell Reports*)
- Integrative analysis of ChIP-seq and RNA-seq datasets

**Research Assistant** July 2014 - June 2015  
Lynda Chin's Lab, Genome Medicine, MD Anderson Cancer Center Houston, TX

- Genome wide analysis of non-coding regulatory mutations in cancer
- Lymphocytic Infiltration as a basis of response in melanoma tumors (Published in *Cell*)

**Graduate Rotation Student** Sept 2013 - May 2014  
Baylor College of Medicine Houston, TX

- Han Liang's Lab: Analyzed RNA-seq Data for various TCGA Datasets for the potential unique transcription factors per subtype
- Lynda Chin's Lab: Analyzed known mutations in leukemia dataset for Apollo Project and the reported somatic mutations in COSMIC
- Zhandong Liu's Lab: Correlation network for 90,000 samples from Affymetrix Human Genome U133 Plus 2.0 Array

**Bioinformatics Scientist** July 2010 - July 2013  
Shmulevich Lab, Institute for Systems Biology Seattle, WA

- Rhinovirus vs Influenza Virus Project: Analyzing the similarities and differences between the two viruses using microarray datasets
- Tol-II Receptors Project: Analysis of Pol-II, Transcription Factor, HDAC ChIP-seq datasets, Integrative analysis with gene Expression data for the discovery of gene regulatory network that gets activated in the presence of Tol-II receptors (Published in *Nature*)

- Poised Genes Project: Predicting poised genes in the macrophages using machine learning algorithms
- In-House ChIP-seq Pipeline: Development and integration of various functionalities within the pipeline

#### Statistician

Nov 2009 - July 2010

Computational Genetics Lab, WPIC-UPMC

Pittsburgh, PA

- Palau Project: Analyzed GWAS datasets for the detection of causal genes in psychotic disorders and schizophrenia and
- Implemented genomic distance based multivariate regression model for the estimation of Identity by Descent (IBD) in the haplotype datasets
- Worked on the detection of IBD for the use of the population based linkage analysis among the case and control pairs

#### Research Assistant Programmer

Apr 2009 - Oct 2009

Department of Biomedical Informatics, University of Pittsburgh

Pittsburgh, PA

- Feature/covariates selection from comparative and high-throughput data for the prediction of protein-protein interaction pairs
- Computational prediction and accuracy of different statistical based algorithms such as discriminative and generative algorithms, and clustering based algorithms

#### Research Assistant

Sept 2007 to Dec 2007

Murphy Lab, Carnegie Mellon University

Pittsburgh, PA

- Development of database using PostgreSQL and JSP as back-end and front-end respectively

#### Research Trainee

Dec 2005 to Nov 2006

Institute of Genomics and Integrative Biology

New Delhi, India

Advisers: Dr. S. Ramachandran and Dr. Vani Brahmachari

- B.Tech Thesis: "Study of Host Protein Mimicry of *M. tuberculosis* proteins in *H. sapiens*"
- Comparative genomic analysis of *M. tuberculosis* H37Rv with *H. sapiens* using sequence and structural based approaches

#### Course Projects

- [Loan Default Prediction - Imperial College London \(Kaggle dataset\)](#). A. Raman and M. Chen. (Comp 540, Spring 2014; Prof. Devika Subramanian)
- [Analysis and Forecast of Start-Up Companies](#). A. Raman, Y. Miao and G. Breternitz (Stat 405, Fall 2013; Dr. Roberto Bertolusso) - Our project was used as a reference for Spring/Fall 2014-2015 class
- CMBMS Final Project: B-cell HIV Epitope Predictor (B-HIVE P). S Garimalla, A Raman, V Pillalamarri (03-712 Course Project, Fall 2008; Prof. Russell Schwartz, CMU)
- Developed ORF and Gene Prediction Tool in prokaryotes in Perl and HTML (Genomics & Computational Molecular Biology Course Project, Spring 2005; Prof. Ghosh, VIT) – Awarded as the best class project

#### Relevant Courses

- *Massive Open Online Courses*: Machine Learning (Coursera), RNA-seq data analysis (edX)
- *Baylor College of Medicine (Ph.D. course work)*: Computational Mathematics for Quantitative Biomedicine, Methods and Logic in Molecular Biology
- *Rice University (Ph.D. course work)*: Molecular Biophysics, Statistical Computing & Graphics, Statistical Machine Learning, Cancer Biology, Probability & Statistics

- *Carnegie Mellon University (M.S. course work)*: Data Mining, Applied Machine Learning, Computational Biology, Computational Methods for Biological Modeling & Simulation, Mathematical Models, Advanced Molecular & Cell Biology, Data Structure & Algorithms
- *Vellore Institute of Technology (B.Tech course work)*: Biochemistry, Cell Biology, Immunology, Probability and Biostatistics, Discrete Math, Genomics, Proteomics, Systems Biology, Programming Languages, Databases, Machine Learning, Structure and Molecular Modeling, Molecular Evolution and Phylogeny, Artificial Intelligence, Data Mining and Warehousing
